Hi Tom:

Sorry for the delay in sending these over. This does not give you enough time, so I could initially take you through these and we can talk again if you would like. Or we can postpone our discussion to 3:30. Your choice.

The first of these issues further elaborates (or is my version of it) on the point that David Bussard raised in our meeting.

The file COV.pdf is to be used for the last issue in the other attached file with your name on it.

The call-in no is (b) (6)

Barbara Glenn, the CM for formaldehyde may join us.

Ravi.
